# ABOUT US

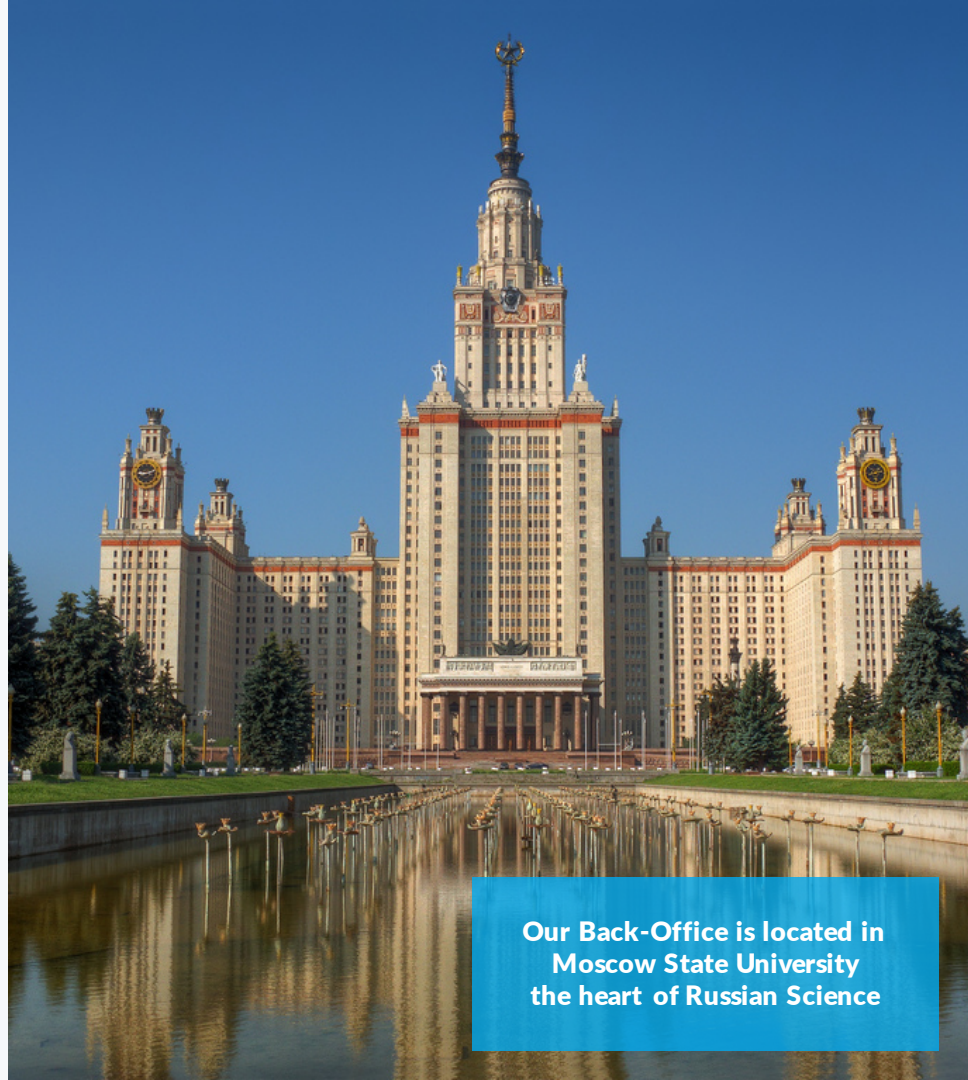

---

# WHO WE ARE

- ✓ Our team was founded in 2013 at the premises of MSU, first place in the rating of Russian Universities
- ✓ We are professional web-developers, winners of Russian and international programming contests
- ✓ Main specializations are: front-end development, back-end-development, database and server administration
- ✓ Our team consists of 7 key programmers, 10 project developers and more than 100 qualified programmers and mathematicians on demand
- ✓ We are students and post-graduate students of MSU faculty of Computational Mathematics and Cybernetics and other technical universities
- ✓ Since 2013 our team has been growing steadily by 1-3 new programmers per year

WEBPROJECT TEAM

Our Back-Office is located in  
Moscow State University  
the heart of Russian Science

---

## OUR AWARDS

### RANKED #1 IN KASPERSKY DEVCUP

Kaspersky contest for software development among 100 teams from Russia, Ukraine and Belarus

### ACM ICPC NOMINATION

Our chief developer participated in the world programming contest ACM ICPC World Finals as the member of Russian team

### MAKS AIRSHOW REPORT

We were invited to present our forecast model on Moscow International Aviation and Space Show

---

# OUR LOCATIONS

## MOSCOW, MOSCOW STATE UNIVERSITY

Our back-office is situated in MSU, ranks #1, our alma mater.

That helps us to keep abreast of all trending technologies and to have access to open-minded and qualified specialists

## MOSCOW, 300 M FROM KREMLIN

Since Dec 2015 our second office is located in the city center, on Nikolskaya street within 300 m from the Kremlin and Red Square.

We kindly invite our partners and customers to visit us here.

## SALZBURG, AUSTRIA

Since Jan 2017 we have been expanding further into Europe. Now we are represented by a branch in Salzburg, Austria.

Our European partners are kindly invited to visit our new cozy office.

# KEY POINTS IN OUR HISTORY

## AIR PASSENGER FLOW MODEL

The first project that started it all. We developed mathematical model for the forecast of air passenger flows between Russian cities and their distribution into different types of airplanes.

## MSU PROJECTS

Shortly after the first project we broadened the focus to include not only mathematics, but also web-development.

We developed news feed and interactive map for MSU.

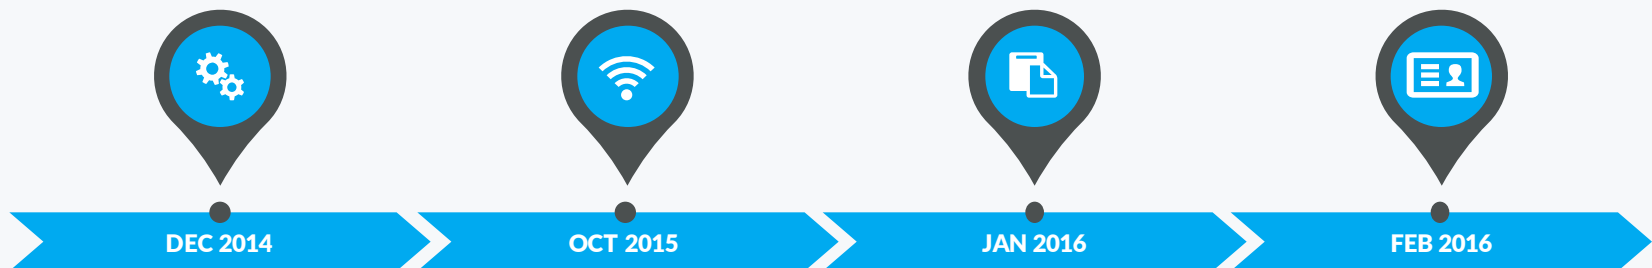

## DELIVERY AGGREGATOR

Postscanner is a web-application which aggregates offers from more than 40 shipment service providers. It allows to compare the delivery price and timeframe that suits client's needs.

## ANALYTICS PLATFORM

We created a multifunctional online-platform for unstructured statistics and analytical data visualization. This platform is an extremely flexible and powerful tool for analytics and visualization.

# KEY POINTS IN OUR HISTORY

## BROKER AUTOMATISATION

Interactive web-platform offers great opportunities for bank guarantees and tender credit issue automation. This platform includes Client - Agent and Agent - Bank interactions, scoring, an automatic collection of contractors data and semi-automatic application processing through bank product terms and conditions.

## SMM VIA PUBLIC WIFI

Service for public WiFi authentication through social networks. It collects visitors' data and statistics to find out who your customers are. It is also a powerful marketing tool as for every check-in at your location, your brand will be shared with each of client's SM friends.

Later this project was bought by investor who launched it in New York, USA.

## ERP SYSTEM

New solution. We created a system for company administrating, controlling and business process automation. The system includes Clients, Orders, Logistics, Suppliers cooperation, Bookkeeping and Finance Reports modules. It is compatible with tablets and mobile phones.

## PSYCHOLOGICAL PLATFORM

Platform for testing and automated result analysis. The complex solution includes psychological, intellectual and biographical tests. The individual module includes vocational guidance and psychological profiling. The corporate module provides a deeper analysis and helps in recruitment, staff assessment and development.

# KEY POINTS IN OUR HISTORY

## MINISTRY OF CONSTRUCTION

State project for Bashkortostan Republic region. We created a platform for construction budget planning, logistics optimisation and optimal supplier selection. The system is working with the roads, suppliers, materials, typical construction objects databases.

## EURASIAN BANK SYSTEM

We launched our system in Russian branch bank of Eurasian bank (#10 in Kazakhstan Banks ranking). Our system provides Client-Bank and Agent-Bank interaction, electronic document flow, Bank internal business processes automatization, collecting and analyzing data from state official resources.

## MORE PROJECTS

Today we have wide experience in high load systems development, business processes automatization.

Throwing ourselves in a project inevitably leads to extending our knowledge and skills in new fields.

Today we are looking for open-minded specialists in all spheres to become our partners, investors, customers and friends!

## WHAT'S NEXT?

Depends on you. Let's continue this story together.

# FOCUS AND TECHNOLOGIES

---

# OUR MAIN FOCUS

## WEB-DESIGN AND MARKETING

We are focused on sophisticated solutions for business process automation alongside with web-design and marketing.

## COMPLEX WEB-SOLUTIONS

We manage projects of any complexity or scale. We blot the word "impossible" out of our vocabulary. You don't need to make a compromise for creating your dream-project.

## DATA ANALYSIS AND MODELING

We are dedicated mathematicians. We are very proud of our projects in complex mathematical modeling for practical use and never forget to keep pace with evolving technologies.

# OUR BASIC TECHNOLOGIES

## FRONT-END

- ✓ HTML 5
- ✓ CSS 3
- ✓ Bootstrap
- ✓ Javascript
- ✓ JQuery

## CMS

- ✓ Wordpress
- ✓ Opencart
- ✓ Any other php cms

## BACK-END

- ✓ PHP
- ✓ PYTHON
- ✓ JAVA
- ✓ R

## FRAMEWORKS

- ✓ Yii
- ✓ Symfony
- ✓ Django
- ✓ Spring MVC

## DATABASE

- ✓ MySQL
- ✓ PostgreSQL
- ✓ MongoDB

## MATHEMATICS

- ✓ Data Mining
- ✓ Machine Learning
- ✓ Cryptography

# PROJECTS AND SOLUTIONS

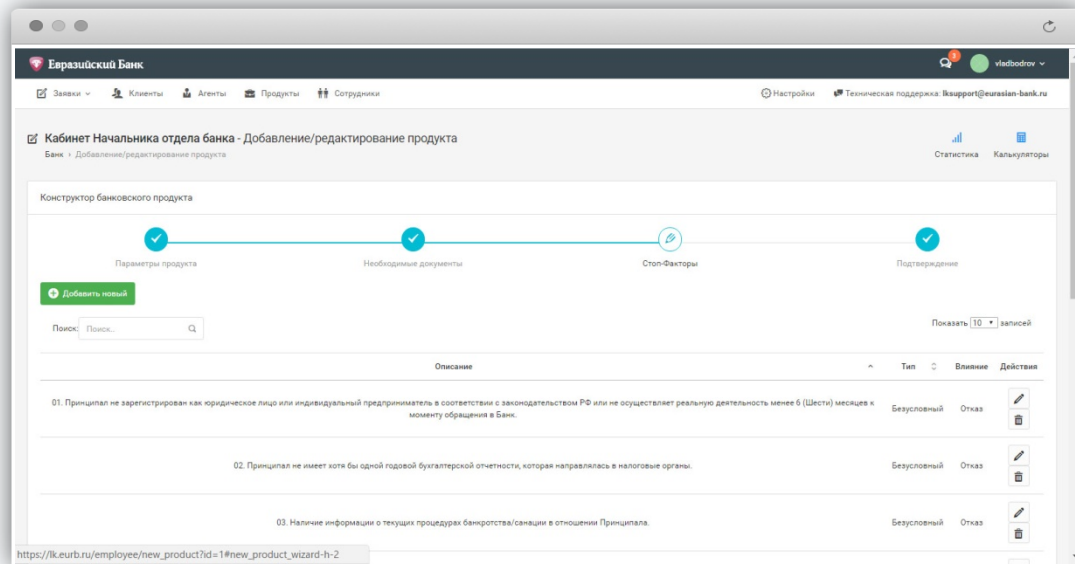

# BANK SYSTEM FOR EURASIAN BANK

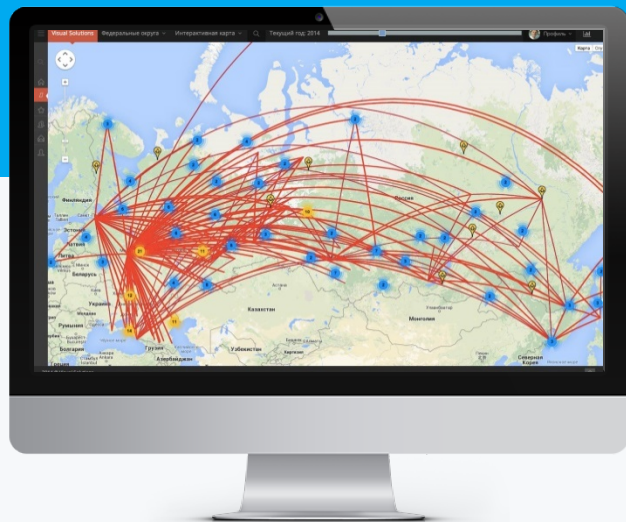

## E-DOCUMENT FLOW AND BANK BUSINESS-PROCESSES AUTOMATION

### Solution Outline

- 1 Bank-Client and Bank-Agent document flow and chat
- 2 Automatic data gathering of potential clients
- 3 Electronic signature and verification
- 4 Stop-factors and scoring model
- 5 Flexible bank product builder
- 6 Flexible user role constructor
- 7 Any browser and platform compatible
- 8 Security audit and control

## MULTIFUNCTIONAL ANALYTICAL WEB-PLATFORM

Powerful tool for unstructured statistics and analytical data visualization and processing

**Universal.**

Economic variables,  
Geo data, forecasts,  
etc.

**Big Data optimized.**

Working with sets of  
millions records in  
different contexts.

**Mobile.**

Any browser and  
platform compatible

**User-friendly  
interface.**

# PSYCHOLOGICAL TESTING PLATFORM

профдиалог

## PROFDIALOG

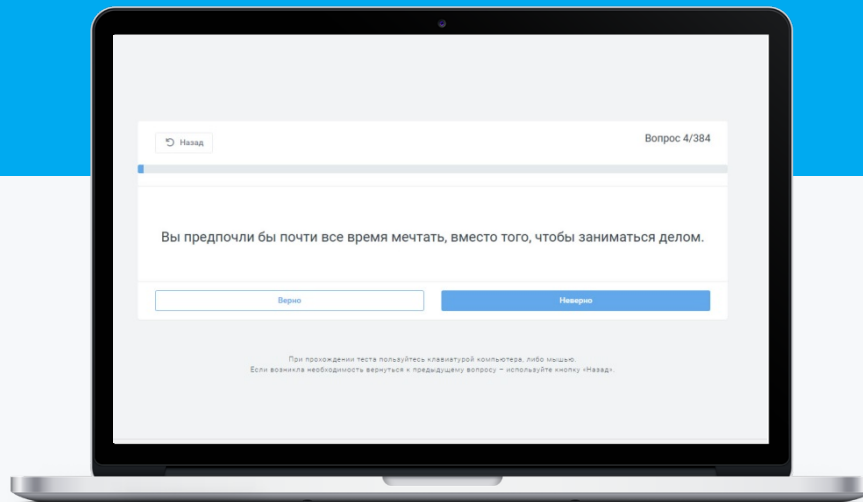

3 types of test: psychological, intellectual and biographical with automated results analysis

For individual clients: vocational guidance, psychological personality profiling, competence and recommended activities, motivation system

For corporate clients: recruitment support, career consulting, competence analysis, staff assessment and development.

# EVROPOLY ADMINISTRATING SYSTEM

**ЕВРОПОЛЫ**  
СТУДИЯ ДЕРЕВЯННОГО ПОЛА

1

## BUSINESS PROCESS CONTROL

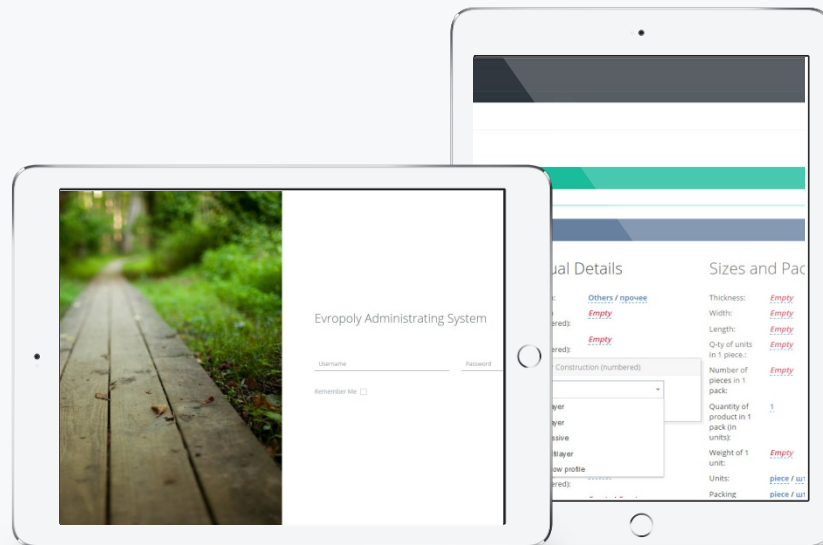

The system covers all main business processes of the international parquet trading company Evropol and includes modules for:

1. Clients
2. Employees
3. Orders
4. Logistics
5. Warehouse
6. Bookkeeping

2

## MOBILE

Works on any device connected to the Internet in any point of the world

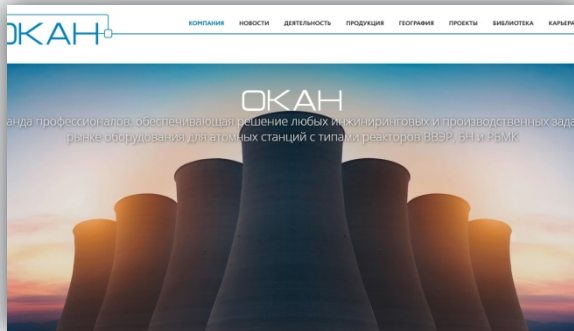

# LOTS OF WEBSITES

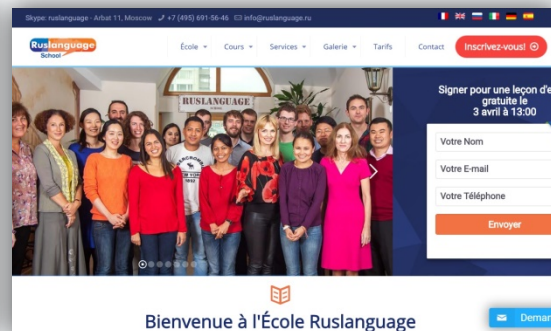

## AUSTRIAWOOD.COM

Website for parquet dealer and producer company in Salzburg, Austria

## OKAN.SU

Website for atom engineering and consulting company in Saint Petersburg, Russia

## RUSLANGUAGE.RU

Website for school of Russian language for foreigners, Arbat street, Moscow, Russia

---
